

## Attrition rate decline over six years

**Texas is improving attrition rates by 1-2 percent each year**

**But Pharr-San Juan-Alamo school district in south Texas cut dropout rates in half.**

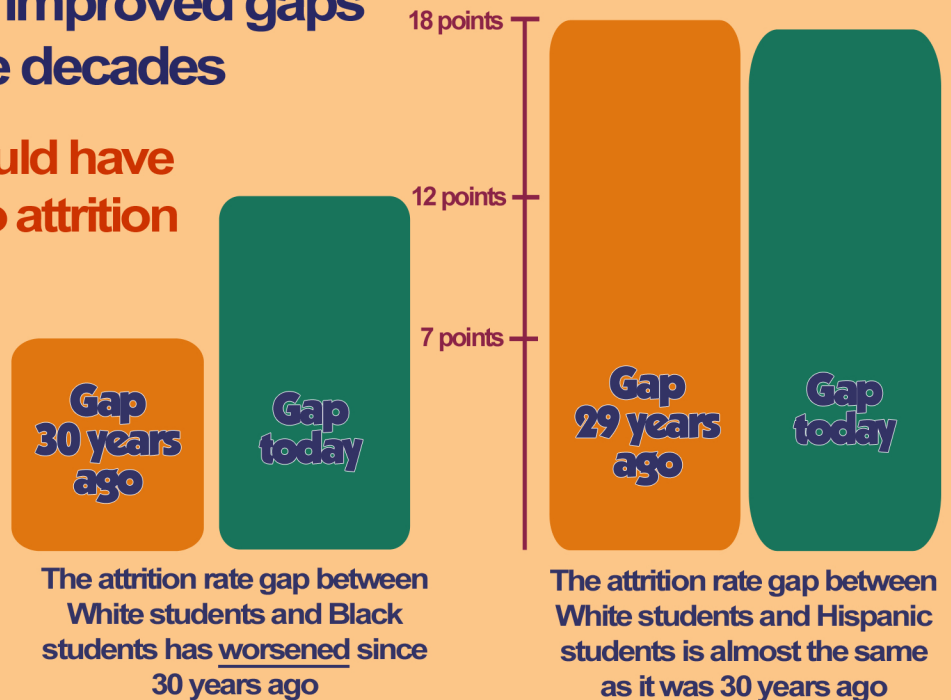

They did so by using actionable data to strengthen curriculum quality and access, quality teaching, and student engagement.\* Others can too.

At the same time, the state of Texas has weakened curriculum requirements.

\* See IDRA's College Bound & Determined report [www.idra.org](http://www.idra.org)

**Texas has not improved gaps in almost three decades**

**By now we should have no gap and zero attrition**

The attrition rate gap between White students and Black students has worsened since 30 years ago

The attrition rate gap between White students and Hispanic students is almost the same as it was 30 years ago

**It doesn't have to be this way**
