

## Quality School Holding Power Checklist

It has never been as important for schools to have the tools needed to decrease their dropout rates. IDRA's Quality School Holding Power Checklist provides a set of criteria for assessing and selecting effective dropout prevention programs or models, as well as determining if your school is a quality school ready to ensure all students stay in school and succeed.

The Quality School Holding Power Checklist is based on a different paradigm for preventing dropouts. For years, researchers, educators and policymakers have generally focused on "fixing" students rather than on strengthening or changing the school systems that are accountable and responsible for ensuring that children and youth succeed throughout the educational system.

Since 1973, IDRA has worked to change the focus from a deficit perspective to a valuing of all children. IDRA has led the paradigm shift from dropouts to "school holding power" – the idea that schools must hold on to students because of their inherent value, their contributions and their potential significance to their communities and society, as a whole. This shift changes a school culture from "preventing dropouts" and finding students who are "at risk" to creating a quality school culture that seeks ways to hold on to students and develops a graduation plan for each and every student. The checklist here is based on significant research and evaluation conducted by IDRA and others. It takes into account important factors for schools deemed at risk of losing students. Total your score and see where there is work to be done to make your school a "Quality School" with strong school holding power.
