Introduction

Data from the Office for Civil Rights reflect the reality that confronts other researchers and advocates who study school discipline: minority students, particularly Black students, remain a population that is disproportionately subject to discipline practices that remove them from the academic environment.

- Black public preschool children are suspended at high rates – these children are 19 percent of enrollment, but 47 percent of those who received one or more out-of-school suspensions.
- In K-12 public schools, Black boys represent 18 percent of suspensions, along with 10 percent of Black girls. This is in contrast to a rate of 5 percent for White boys, and 2 percent for White girls.
- Black students are 3.8 times as likely to be subject to out-of-school suspension as White students.
- Black students are 1.9 times as likely to be expelled from school as White students. Black boys represent 8 percent of students, but 19 percent of those who are expelled without educational services.
- Black students are 2.3 times as likely to be referred to law enforcement or subject to a school-related arrest than White students.
- American Indian, Alaska Native, Latino, Native Hawaiian, other Pacific Islander, and multiracial boys represent 15 percent of K-12 students but are 19 percent of K-12 students subject to one or more out-of-school suspensions.
- Students with disabilities are more than twice as likely to receive one or more out-of-school suspensions (11 percent) than students without disabilities (5 percent).
- Over 100,000 students were placed in seclusion, involuntary confinement, or were physically restrained. This includes more than 67,000 students with disabilities served by IDEA.
The reasons minority students are subject to exclusionary discipline more often than others are varied, but many experts agree that they often have little to do with the students themselves. Large rates of suspensions and expulsions tend to result from discipline policies in need of revision that are exacerbated by numerous administrators and teachers who are not provided enough support about how best to handle discipline issues in school. The issue of implicit bias also has a role to play in these numbers, and that too is an area where educators, students, and their families need to be given proper information and support.

Expulsions and suspensions are in violation of civil rights laws if they are found to be administered in such a way that targets minority students. And the data show nationally that children are up to 10 times more likely to drop out of high school if they’ve been expelled or suspended.

This eBook was developed by the IDRA EAC-South*, which is one of the federally-funded equity assistance centers that help school districts build capacity to confront educational problems occasioned by race, national origin, sex and gender, and religion. Our expert staff have effectively assisted several hundred school districts across the South to help desegregate the schools and programs and engender a more equitable learning environment for all students. The IDRA EAC-South provides technical assistance and training to build capacity of local educators in multiple areas including reducing disproportionate school discipline for school districts cited by the Office for Civil Rights. IDRA’s center covers Washington, D.C., and 11 states: Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas and Virginia.

Zero Tolerance Policies Likely Contribute to High Attrition Rates of Black Students and Hispanic Students

Roy Johnson; Texas Public School Attrition Study, 2014-16; November 2016

Zero tolerance policies likely contribute to high attrition rates of Black students and Hispanic students in Texas public schools. In an additional analysis to IDRA’s annual attrition study released in 2016, IDRA compared the trend lines for attrition rates to those of discipline data for the state of Texas. The historical high attrition rate for each race-ethnicity group parallels the period when zero tolerance policies gained momentum in Texas. Lower attrition rates for each group coincide with Texas’ legislative attempts to relax zero tolerance approaches under specific circumstances.

Ensuring Equity and Nondiscrimination in Student Discipline Policy and Practice

David Hinojosa; IDRA Newsletter; February 2016

From a social media post showing a young high school girl being flung across the floor by a school resource officer to national reports of stark racial disparities in suspension rates, school discipline has resurfaced as a critical civil rights educational issue. Importantly, these events have forced many school boards, leaders and communities to take a second look at the systemic issues underlying poor disciplinary practices and the antiquated, ineffective policies around them.

In this article, David Hinojosa, J.D., discusses factors that lead to unfair discipline and lists steps schools can take to begin or renew efforts in evaluating and correcting their student disciplinary policies and practices.

http://www.idra.org/IDRA_Newsletter/February_2016_Valuing_%26_Asset-Based_Solutions/Ensuring_Equity_and_Nondiscrimination/
The Civil Rights Data Collection is a vital resource that provides the public an opportunity to understand how our nation and individual states, districts, and schools serve all students, including our students of color, English learners, and students with disabilities.

The troubling disparities revealed in this comprehensive, searchable database serve as a reminder of the importance of ensuring all students have equal access to educational opportunities.

Stories of school discipline going too far circulate social media and the news cycle pretty regularly these days, such as the video from Spring Valley High School in South Carolina. Millions of children are being removed from classrooms for increasingly minor behavioral issues.

While school officials have a responsibility to keep the school learning environment safe, the data show widespread discrimination in school discipline that puts student civil rights and learning at risk. According to the Office for Civil Rights, Black students are suspended and expelled at a rate three times greater than white students. Harsh punishments are disproportionately used on children of color, low-income children, children with disabilities, and LGBT youth. These practices discourage children from attending school and increase the risk of students dropping out.

David Hinojosa, J.D., gives an overview of the civil rights protections that are in place, the negative impact of many school discipline practices and points to resources available to schools and teachers.

http://www.idra.org/Podcasts/Resources/Civil_Rights_in_Student_Discipline/
New national data on school disciplinary practices show that millions of children are being removed from classrooms for increasingly minor behavioral issues. Estimates show that 10 percent of middle school and high school students were suspended at least once. And in Texas, only less than 3 percent of cases, removal from school – through suspension or expulsion – was legally required.

Laurie Posner, MPA, highlights data on the scope of the problem across the country and in Texas and gives examples of family leaders, community organizations, children’s advocacy, and youth across the South who are taking action to bring a halt to punitive practices that they recognize as ineffective, unfair and unsafe.

Disciplinary Alternative Education Programs in Texas – A 2009 Update
Dr. Albert Cortez; Intercultural Development Research Association; 2009

Almost 10 years ago, IDRA gave voice to the thousands of Texas public school students who were being criminalized, ostracized and stigmatized for “offenses” that were formerly managed by a simple timeout or even a visit to the principal’s office with its seminal assessment of Texas DAEPs.

IDRA’s policy update shows that in the last decade, more than three quarters of a million students have been sent to DAEPs. Four out of five students of them are not there because of serious offenses. Put simply, DAEPs are a mess. They don’t work for kids, they don’t work for schools, and they don’t work for Texas.

Dear Colleague Letter:

Nondiscriminatory Administration of School Discipline

U.S. Department of Justice and U.S. Department of Education; January 8, 2014

This letter provides information describing how schools can meet their obligations under federal law to administer student discipline without discriminating on the basis of race, color, or national origin. The letter is part of the departments’ school discipline guidance package that will assist states, districts and schools in developing practices and strategies to enhance school climate, and ensure those policies and practices comply with federal law.

How Educators Can Eradicate Disparities in School Discipline: A Briefing Paper on School-Based Interventions
Anne Gregory, James Bell & Mica Pollock; Discipline Disparities Series; March 2014
In order to improve the state of our knowledge and encourage effective interventions, the Discipline Disparities Research to Practice Collaborative, a group of 26 nationally known researchers, educators, advocates, and policy analysts, came together to address the problem of disciplinary disparities. A culminating report is the Discipline Disparities Briefing Paper Series, three papers on policy, practice and new research summarizing the state of our knowledge and offering practical, evidence-based recommendations for reducing disparities in discipline in our nation’s schools.

Keeping Kids in Class Toolkit
Georgia Appleseed
This handy toolkit provides powerful, yet easy-to-understand, easy-to-access data and other information that will help parents and school leaders in local districts throughout the state to work together to convert the school exclusion to prison pipeline into the school to opportunity pipeline.
https://gaappleseed.org/initiatives/toolkit
Multiple Responses, Promising Results: Evidence-Based, Nonpunitive Alternatives to Zero Tolerance
Christopher Boccanfuso & Megan Kuhfeld; March 2011
This brief by Child Trends reviews existing research on the implementation and effects of zero tolerance in the school setting and highlights rigorously evaluated, nonpunitive alternatives to zero tolerance that have shown greater promise in improving school safety and student outcomes.
http://www.nea.org/assets/docs/alternatives-to-zero-tolerance.pdf

Preventing Student Disengagement and Keeping Students on the Graduation Path in Urban Middle-Grades Schools: Early Identification and Effective Interventions
Robert Balfanz, Liza Herzog & Douglass J. Mac Iver; Educational Psychologist; 2007
Addresses the issue of student disengagement as it relates to minority students who are often left behind by the educational system at a young age and thus are more likely to be disengaged in the classroom.

Restorative Justice Practices and Bullying Prevention
States and districts are increasingly in support of policies and practices that shift school discipline away from zero tolerance, such as suspension and expulsion, to discipline that is focused on teaching and engagement.
The School Discipline Consensus Report: Strategies from the Field to Keep Students Engaged in School and Out of the Juvenile Justice System
Emily Morgan, Nina Salomon, Martha Plotkin & Rebecca Cohen; Council of State Governments Justice Center; 2014
Presents a comprehensive set of consensus-based and field-driven recommendations to improve conditions for learning for all students and educators, better support students with behavioral needs, improve police-school partnerships, and keep students out of the juvenile justice system for minor offenses.

The Science of Equality, Volume 1: Addressing Implicit Bias, Racial Anxiety and Stereotype Threat in Education and Healthcare
Rachel Godsil, Linda R. Tropp, Phillip Atiba Goff & John A. Powell; Perception Institute; November 2014
Details how unconscious phenomena in our minds – implicit bias, racial anxiety, and stereotype threat – impact our education and health care systems, while offering empirical, research-driven solutions to overcome their effects.

Supporting and Responding to Behavior: Evidence-Based Classroom Strategies for Teachers
Ideas that Work, U.S. Office of Special Education Programs; 2015
Summarizes evidence-based, positive, pro-active, and responsive classroom behavior intervention and support strategies for teachers. These tools can help teachers capitalize on instructional time and decrease disruptions, which is crucial as schools are held to greater academic and social accountability measures for all students.

Are Zero Tolerance Policies Effective in the Schools?
An Evidentiary Review and Recommendations
American Psychological Association Zero Tolerance Task Force, American Psychologist; December 2008
To address the needs of schools for discipline that can maintain school safety while maximizing student opportunity to learn, the report offers recommendations for both reforming zero tolerance where its implementation is necessary and for alternative practice to replace zero tolerance where a more appropriate approach is indicated.

Breaking Schools’ Rules – A Statewide Study of How School Discipline Relates to Students’ Success and Juvenile Justice Involvement
Tony Fabelo, Michael D. Thompson, Martha Plotkin, Dottie Carmichael, Miner P. Marchbanks & Eric A. Booth; Council of State Governments Justice Center; July 2011
This report describes the results of an extraordinary analysis of millions of school and juvenile justice records in Texas. It was conducted to improve policymakers’ understanding of who is suspended and expelled from public secondary schools, and the impact of those removals on students’ academic performance and juvenile justice system involvement.
Center for Civil Rights Remedies

Closing the School Discipline Gap Conference & Research Papers
The Center for Civil Rights Remedies at UCLA’s Civil Rights Project, Education Week, Gallup, and the Equity Project at Indiana University hosted Closing the School Discipline Gap, a one-day conference (January 2013) exploring the impacts of exclusionary school-discipline practices, research-based approaches to reducing the discipline gap, and efforts to end the school-to-prison pipeline. See the Research to Practice conference summary and research papers.
https://www.civilrightsproject.ucla.edu/events/2013/closing-the-school-discipline-gap-conference-research-papers

Corporal Punishment: A Barrier to Education for Children with Disabilities
Elinor Milne, Global Initiative; 2013
The Global Initiative to End All Corporal Punishment of Children hopes that the OHCHR study on the right to education of persons with disabilities will recommend prohibition and elimination of corporal punishment in schools and all other settings of children’s lives.

Corporal Punishment in U.S. Schools
Report by C. (Colin) Farrell
http://www.corpun.com/counuss.htm
Disciplinary Alternative Education Programs in Texas – What is Known?
Albert Cortez & María Robledo Montecel; Intercultural Development Research Association; 1999
This policy brief examines how these programs have been carried out after the Texas legislature established a policy in 1995 requiring school districts to have an “alternative educational setting for behavioral management.” These programs manage more than 90,000 pupils a year and cost millions of state taxpayer dollars. But we know very little of what they do, much less how (or how well) they do it. Part of a series on key issues in education developed by IDRA, this brief includes policy recommendations, findings at a glance, the national picture, an overview of the Texas policy, findings examined, and a closer look at one school.

Disproportionate Impact of K-12 School Suspension and Expulsion on Black Students in Southern States
Center for the Study of Race and Equity in Education; 2015
This report aims to make transparent the rates at which school discipline practices and policies impact Black students in every K-12 public school district in 13 Southern states: Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas, Virginia, and West Virginia.
Documenting Disparities for LGBT Students: Expanding the Collection and Reporting of Data on Sexual Orientation and Gender Identity

Mariella Arredondo, Chrystal Gray, Stephen Russell, Russell Skiba & Shannon Snapp; Discipline Disparities Research to Practice Collaborative, Equity Project at Indiana University; 2016

The lesbian, gay, bisexual, and transgender (LGBT) community has been historically overlooked, and current efforts by researchers across the country have called for more research and policy to include these students, especially gathering information about discipline and its impact on this population. Though it is common knowledge to educational experts that LGBT students are at a higher risk of being bullied, research also shows that they disproportionately face suspension and expulsion when compared to their heterosexual peers.

A Generation Later – What We’ve Learned about Zero Tolerance in Schools, Issue Brief

Jacob Kang-Brown, Jennifer Trone, Jennifer Fratello & Tarika Daftary-Kapur; Vera Institute of Justice; December 2013

In considering different strategies for promoting productive and safe school environments, it can be difficult to know what works and what doesn’t. In particular, longstanding debates about zero tolerance policies leave many people confused about the basic facts. This publication aims to answer these questions by drawing on the best empirical research produced to date and to identify the questions that remain unanswered.

Grade Retention & Demotion: A Traditional Discipline Consequence

Natalie Hoff, Reece L. Peterson & Jenna Strawhun; University of Nebraska-Lincoln; 2014

Students with social and emotional problems are often retained, but not directly as a disciplinary consequence. In addition to students who are held back, those who are deficient in credits and unable to graduate might also be considered “retained.” The brief also states that, while it is not a direct cause, retention has been identified as one of the more powerful predictors of dropping out of school.  
http://k12engagement.unl.edu/strategy-briefs/Grade%20Retention%20%26%20Demotion%2011-30-15%20_0.pdf

The High Cost of Harsh Discipline and its Disparate Impact

Russell W. Rumberger & Daniel J. Losen; The Center for Civil Rights Remedies; 2016

This report on exclusionary discipline, specifically suspension rates for children of color, points to economic losses when so many children are not living up to their full potential. Researchers carefully and conservatively quantifies the costs of suspension in two highly populated states, Florida and California, and for the nation.  

Identifying Potential Dropouts – Key Lessons for Building an Early Warning Data System

Achieve, Inc.; June 2006

This white paper was prepared for Staying the Course: High Standards and Improved Graduation Rates, a joint project of Achieve and JFF funded by Carnegie Corp. of New York. Its goal is to provide policymakers with an overview of research about the dropout problem and the best strategies for building an early warning data system that can signal which students and schools are most in need of interventions.  
Implicit Racial Bias and School Discipline Disparities – Exploring the Connection
Cheryl Staats; Kirwan Institute for the Study of Race and Ethnicity; May 2014
This report seeks to uplift implicit bias as a possible contributing factor to the racialized discipline disparities we see in K-12 education.
http://kirwaninstitute.osu.edu/wp-content/uploads/2014/05/ki-ib-argument-piece03.pdf

In-Grade Retention in the Early Years – What’s Holding Children Back?
Paula Johnson; IDRA Newsletter; October 2016
This article reports on the current rates of retention in Texas public schools, the cost of retention, and characteristics of successful PK-3 programs. 59,294 elementary school students in Texas were held back a grade in 2013-14. The trends here are comparable to those across the country.
http://budurl.com/IDRAnOct16b

Just Learning – The Imperative to Transform the Juvenile Justice System
Southern Education Foundation; 2014
With awareness growing that schools are disciplining and suspending minority students at alarming rates, the report provides powerful evidence that young people placed in the juvenile justice system—predominately minority males incarcerated for minor offenses—are receiving a substandard education.

Nation-wide Survey of State Education Agencies’ Online School Disciplinary Data for Students with Disabilities

*The Civil Rights Project; Summer 2014*

UCLA Civil Rights Project’s Center for Civil Rights Remedies has extracted information from all 50 state education agency (SEA) websites and Washington, D.C., to compile publicly-reported school disciplinary data.

Opportunities Suspended – The Devastating Consequences of Zero Tolerance and School Discipline Policies

*National Summit on Zero Tolerance, Advancement Project & Civil Rights Project; June 1, 2000*

This is the first comprehensive national report to scrutinize the impact that the brutally strict zero tolerance approach to discipline, currently being used in public schools, is having on American children.

Racial Disproportionality in School Discipline: Implicit Bias is Heavily Implicated

*Tom Rudd; Kirwan Institute for the Study of Race and Ethnicity; February 2014*

Report that provides city-specific data illustrate the magnitude of this problem of implicit bias.

Sent Home and Put Off-Track – 
The Antecedents, Disproportionalities, and 
Consequences of Being Suspended in the 9th Grade
Robert Balfanz, Vaughan Byrnes & Joanna Fox; April 6, 2013
This study finds that policies seeking to address these issues cannot focus on reducing suspensions alone, but must also address student attendance and course passing in a comprehensive and systematic manner. This research is part of the “Closing the School Discipline Gap Conference” of January 2013. An overview of the research project can be found here; for a list of the 16 studies presented, click here.

Public Schools: Prevalence, Disparities in Use, and 
Status in State and Federal Policy
Elizabeth T. Gershoff & Sarah A. Font; 2016
The aim of this policy report is to fill the gap in knowledge about school corporal punishment by describing the prevalence and geographic dispersion of corporal punishment in U.S. public schools and by assessing the extent to which schools disproportionately apply corporal punishment to children who are Black, to boys, and to children with disabilities. The report summarizes sources of concern about school corporal punishment, reviews state policies related to school corporal punishment, and discusses the future of school corporal punishment in state and federal policy.
Suspended Childhood – An Analysis of Exclusionary Discipline of Texas' Pre-K and Elementary School Students

*Texas Appleseed; 2015*

For this report, Texas Appleseed analyzed data on in-school suspensions, out-of-school suspensions, and placements in disciplinary alternative education programs (DAEPs) for Texas children in pre-kindergarten (Pre-K) through fifth grade.

https://slate.adobe.com/a/6dvQB/

Who Believes in Me? The Effect of Student-Teacher Demographic Match on Teacher Expectations

*Seth Gershenson, Stephen B. Holt & Nicolas Papageorge; Economics of Education Review; 2015*

This study explored how racial mismatches between teachers and students, particularly when the teacher was White and the student was Black, resulted in overall lower academic expectations for Black students. The research points to implicit bias as a factor in the results.

http://dx.doi.org/10.17848/wp15-231

Zero Tolerance Policies – Research Brief

Responds to two questions: Are these policies fair or unfair to students in general and minorities in particular? Is there a model that is working well that is a deterrent to violence and drugs in the school?

Resources on Discipline Policy
Advancing School Discipline Reform  
_Greta Colombi & David Osher; National Association of School Boards, Education Leaders Report; 2015_

A comprehensive resource for schools and community members to research how to reform discipline in public schools.

Are Zero Tolerance Policies Effective in the Schools?  
_An Evidentiary Review and Recommendations_

_American Psychologist; December 2008_

The American Psychological Association’s Zero Tolerance Task Force’s report explores the following topics: developmental appropriateness, impact on minority populations, making schools safer, ties to criminal justice, family and community impact, and alternative methods of discipline. Suggestions about reforming zero tolerance include: allowing more flexibility in what actions require strict discipline, providing better training to educators, requiring officers who work in schools to have training in adolescent development, expanding the body of research that studies discipline, and considering alternative methods of discipline to zero tolerance.

Closing the School Discipline Gap – Equitable Remedies for Excessive Exclusion  
_Daniel Losen; Center for Civil Rights Remedies at the UCLA Civil Rights Project (CRP/CCRR); January 24, 2015_

This resource looks at disciplinary policies and practices in school that result in disparities, and provides remedies that may be enacted at federal, state and district levels.
