

Students Deserve to Attend Fully-Funded Public Schools That Affirm and Sustain All Aspects of their Identity

IDRA Testimony Against House Bill 999, Submitted to the Georgia House Education Committee on February 1, 2022

Dear Chairman Dubnik and Honorable Members of the Committee:

Thank you for giving me the opportunity to speak today. My name is Terrence Wilson, J.D., and I am the Regional Policy and Community Engagement Director for IDRA, an independent, non-partisan, education non-profit committed to achieving equal educational opportunity for every child through strong public schools that prepare all students to access and succeed in college. IDRA opposes House Bill 999 because students in Georgia deserve the opportunity to attend excellent, fully-funded diverse schools that affirm and sustain all aspects of their identity. We believe that this bill will likely create a Georgia educational system that is more racially segregated and that does not provide adequate protections for students' civil rights.

Providing students the very best, well-rounded equitable public educational system is at the core of the mandate outlined in Georgia's Constitution in Article VIII, Section I. Our constitution states that "the provision of an adequate public education for the citizens shall be the primary obligation of the State of Georgia." The scholarship voucher program outlined in House Bill 999 could divert significant funds from Georgia's current public schools, and the program will likely significantly reduce these schools' ability to provide all students an adequate education.

Furthermore, research that has been conducted on similar voucher programs does not show that academic gains from this approach are worthy of the investment. For example, a 2017 multi-state review of voucher programs by the Economic Policy Institute found that students in voucher programs scored significantly lower than traditional public school students on reading and math tests, and there was no significant effect of vouchers leading to improved public school performance (Carnoy, 2017). In fact, in some states, participation in voucher programs had negative effects on student achievement, with students enrolled in the Louisiana Scholarship Program increasing their chances of failing math by 50% (Abdulkadiroğlu, et al., 2018). Students in Indiana using vouchers to attend private schools consistently scored lower on reading and math tests than their public school peers (Dynarski, 2017). The evidence simply does not justify the significant risk to the academic futures of Georgia students.

Additionally, IDRA knows, and research agrees, that strong schools are integrated, diverse schools. In fact, decreased racial segregation in schools benefits both non-white and white students academically, socially and emotionally (Seigel-Hawley, 2012). Voucher programs like House Bill 999 have been shown to increase school segregation than promote integration or maintain the status quo (Potter, 2017). Sending Georgian students to private schools will expose them to less diverse environments. White students are significantly overrepresented in private schools while Black and Latino students are significantly underrepresented based on their proportion of the school-age population (NCES Common Core, 2018; NCES Private School, 2018). Furthermore, a significant proportion of private schools in Georgia are racially segregated. According to 2017-18 data nearly 7% of Georgia's private schools are 100% white, 21% are over 90% white, and nearly 47% of these schools are 75% white (NCES Private School, 2018). We encourage leaders to invest in other public school options that will not exacerbate current patterns of racial segregation in schools.

All students should be able to attend schools that affirm and support all aspects of their identity. While the bill does reference that schools participating in the program would have to comply with antidiscrimination laws listed under 42 USC Section 2000d, this provision only prohibits discrimination on the basis of race, color and national origin. Notably absent from HB 999's requirements are protections for students based on sex, gender identity, sexual orientation or religion. Unfortunately, we have seen students be discriminated against on these grounds in other places that have implemented private school voucher programs. (Mead & Eckes, 2018; Wellner & Green, 2018).

Recommendation

Because of the potential impacts on funding for public schools, school diversity, and the protection of students' civil rights, we ask the committee not to move this bill forward and to instead invest in research-based methods to achieve fully-funded, diverse, integrated, culturally-sustaining public schools.

IDRA is available for any questions or further resources that we can provide. Thank you for your consideration. For more information, please contact Terrence Wilson, J.D., Regional Policy and Community Engagement Director, at terrence.wilson@idra.org.
